

JOHN DOMINIC B. ESCOTO

SOFTWARE ENGINEER

imjohndominic08@gmail.com ❖ +971 509 023 917 ❖ Discovery Gardens, Dubai, UAE ❖ otoksedom.github.io/Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building production web applications used by real users. Strong foundation in backend development with PHP, Laravel, REST API design, and SQL databases. Built end-to-end systems that reduced user workload by up to 95% through clean architecture and automated workflows. Experienced in API integration, manual testing, and collaborating with cross-functional teams. Previously worked with VB.NET, C#, and ASP.NET during an internship, providing foundational exposure to the .NET ecosystem. Highly adaptable, curious, and eager to grow under senior mentorship in a collaborative engineering culture.

WORK EXPERIENCE

Technical Support Analyst

Dubai, UAE

Spread Technology

July 2024 – Present

- Independently designed and built an internal React + Laravel web application for project management, task tracking, and productivity reporting.
- Designed REST API structures and backend integrations, reducing integration time by ~30% and accelerating feature delivery.
- Authored technical specifications and API contracts, translating business requirements into scalable system designs.
- Performed manual testing and debugging of backend APIs, validating endpoint responses and identifying edge cases to improve system stability.
- Collaborated with stakeholders to analyze business processes and translate requirements into clear, actionable system features.

Full Stack Developer

Legazpi City, Philippines

Bicol University

February 2023 – April 2024

- Architected and built a centralized research management web application using PHP, CodeIgniter, and MySQL, leading a team of 4 developers from requirements gathering to deployment.
- Designed database schemas and optimized MySQL queries to support data-driven workflows and administrative reporting.
- Automated the Research Coordinator's manual tracking and reporting process, reducing their administrative workload by ~95%.
- Managed the full software development lifecycle, facilitating weekly syncs and maintaining comprehensive project documentation.
- Implemented UI/UX improvements based on user feedback, reducing rework and enhancing user adoption.
- Received Copyright Registration for the Research Management System, officially recognizing the work as an original intellectual property.

Junior Programmer - Intern

Legazpi City, Philippines

Creative Codes Software Solution

February 2019 – March 2019

- Developed, debugged, and maintained software solutions for various clients using VB.NET, C#, ASP.NET, and MySQL.
- Collaborated with senior developers to implement backend logic and database-driven features.
- Gained foundational experience in .NET framework and relational database design.

PROJECTS

Task and Project Management Web Application

Full Stack Developer — Self-Initiated

July 2025 – February 2026

- Built a full-stack web application using Laravel (backend) and React.js (frontend), with REST API architecture and role-based access control.
- Designed and implemented RESTful API endpoints for task management, user authentication, and organization-based permissions.
- Architected relational database schema in MySQL supporting Kanban boards, calendar views, reporting dashboards, and multi-tenant data isolation.
- Implemented middleware for authentication and authorization, ensuring secure API access.
- Performed manual API testing using Postman to validate endpoint reliability.
- Deployed and used for personal task and project tracking during the development.

Capstone Project – Tourism Web Application

Full Stack Developer | Legazpi City, Philippines

February 2022 – December 2022

- Developed a tourism website for the province of Albay using PHP, Laravel, Bootstrap, and MySQL.
- Designed SQL database schema and implemented RESTful API endpoints for dynamic content delivery.
- Integrated Google Maps API for location-based features and implemented responsive UI/UX principles

TECHNICAL SKILLS

Backend Development

PHP, Laravel, REST API Design, API Integration, SQL Server, MySQL, Database Design, CodeIgniter, C#, .NET Core

Frontend & Tools

JavaScript, React.js, HTML/CSS, Bootstrap, Tailwind CSS, Git, Postman, Figma

Cloud & Infrastructure

AWS (EC2, S3, IAM - foundational knowledge from coursework)

Engineering Practices

Manual Testing, API Testing, Technical Documentation, Requirements Analysis, System Design

CORE COMPETENCIES

- Cross-functional Collaboration & Team Leadership
- Stakeholder Communication & Relationship Building
- Requirements Gathering & Technical Documentation
- Adaptability & Quick Learning
- Problem Solving & Analytical Thinking

EDUCATION

Bachelor of Science in Information Technology

Bicol University | Legazpi City, Philippines

2019 – 2023 | Cum Laude

Information Technology — Mobile App and Web Development

STI College Legazpi | Legazpi City, Philippines

2017 – 2019 | With Honors

CERTIFICATIONS & AWARDS

- AWS Cloud Technical Essentials – Amazon Web Services (Coursera) | June 2024
- Developing Back-End Apps with Node.js and Express – IBM (Coursera) | July 2024
- Copyright Registered Work – Research Management System (Bicol University) | 2023
